Removing old concrete sealant and installing a new professional epoxy floor coating costs between **$5.00 and $15.00 per square foot** total. Stripping or grinding off the old sealant generally adds **$1.00 to $3.00 per square foot**, while standard epoxy application ranges from **$4.00 to $12.00 per square foot** depending on the system. Angie's List +1

Cost Breakdown

- **Old Sealant Removal / Surface Prep:** $1.00 – $3.00 per sq. ft. (grinding, shot-blasting, or stripping)
- **Basic Solid Epoxy Coating:** $3.00 – $7.00 per sq. ft. (materials and labor)
- **Decorative / Multi-Coat Epoxy:** $6.00 – $12.00+ per sq. ft. (flake, metallic, or quartz systems) Angie's List +1

Cost Factors to Keep in Mind

- **Condition of the Concrete:** Heavily damaged or cracked concrete requires extra patching and repair fees.
- **Type of Old Sealant:** Thick or stubborn acrylic, polyurethane, or multi-layer sealants take more labor and time to grind away completely than light sealers.
- **Project Size:** Smaller areas often carry a flat minimum service fee from contractors, raising the per-square-foot average.
